## About me

I began my programming journey by writing scripts for Google Spreadsheets using Google Apps Script, which is based on the JavaScript framework. Programming has become my true passion. The decision to become a programmer was a natural step in my development path.

I already have nearly a year of commercial experience as a programmer, which has only reinforced my belief that programming is my lifelong passion.

Currently, my current project has come to an end, which is why I am seeking new employment. I am determined to find a new, inspiring work environment and continue to grow as a programmer, dedicating my full commitment and passion to projects.

## Experience

### Junior System Architect @ [trenujemy.pl](https://trenujemy.pl)

September 2022 - May 2023

- Creating the front-end layer of the admin panel using React.js and Recoil.js.
- Optimizing application performance and creating unit tests for React using React Testing Library.
- Converting received PSD projects into interactive user views using Vue.js.
- Maintaining clean and readable code, adhering to best programming practices and design standards.
- Collaborating with the team and participating in client meetings to understand user interface requirements and application functionality.
- Documenting implemented changes and documenting project progress.

### Few technologies I've been working with:

- JavaScript (ES6+)
- TypeScript
- React
- Recoil.js
- React Testing Library
- Vue
- Node.js
- Express
- GraphQL

# Bootcamps and Courses

Bootcamps I have completed to enhance my programming skills:

- MegaK - 12-months long course aimed mainly at mastering the backend technologies.
- YouCode - Comprehensive and well organised course covering all basics of front end development.
- CodersCamp - 6-months long, free of charge web development course organised by CodersCrew.
- CODE:ME - Stationary 3-month long course in CODE:ME school in their Poznań branch covering basics of javascript and React framework.

I have also finished many online courses by great authors, such as:

- Maximilian Schwarzmuller
- Bartłomiej Borowczyk (Samuraj Programowania)
- Andrew Mead
- Krzysztof Dąbrowski - Youcode
- Jonas Schmedtmann
- Adam Romański (hello roman)

## Previous positions

Before I started programming, I worked on positions such as:

- Supervisors assistant
- Buffer
- Salesman
- Shift coordinator
- Airport cashier

## Skills

### Frontend

HTML5  
Javascript / Typescript  
SASS / SCSS  
React + Recoil / Redux  
Vue  
Material UI  
Basics of Wordpress  
Basics of php

### Backend

Nodejs  
Express  
Nestjs  
MySQL  
GraphQL  
MongoDB

### Tools

Git  
Heroku  
phpMyAdmin  
Postman

### Design

Figma  
Adobe XD  
Adobe Illustrator

### Other Skills

English - level C1 written and spoken  
Driving license cat. B
